TITLE OF INVENTION: Compounds Processes And Intermediates For Synthesis Of

TITLE OF INVENTION: Mixed Backbone Oligomeric Compounds

TITLE OF INVENTION: Mixed Backbone Oligomeric Compounds

FILE REPERENT SIS3239

CURRENT APPLICATION NUMBER: US/09/250,075

CURRENT FILING DATE: 1999-02-12

NUMBER OF SEQ ID NOS: 12

SOFTWARE: Patentin Ver. 2.1

SEQ ID NO 1

LEMOTH: 20

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     FEATURE:

NAME/KEY: misc feature

NOCATION: (1)..(19)

CHER INFORMATION: 2'-methoxyethoxy (MOE)

OTHER INFORMATION: Description of Artificial Sequence: No. 6207819e1

US-09-250-075-1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Gaps

Sequence 23, Application US/08485105A

Patent No. 5863722

GENERAL INFORMATION:
APPLICANT: Sydney Brenner

TITLE OF INVENTION: Massively Parallel Sequencing of Sorted Polynucleotides
NUMBER OF SEQUENCES: 23

CORRESPONDENCE ADDRESS:
ADDRESSEE: Stephen C. Macevicz, Lynx Therapeutics, Inc.
STREAT: 3832 Bay Center Place

i Sequence 19, Application US/08123449A

i Patent No. 5583032

i GENERAL INFORMATION:

APPLICANT: TORRENCE, PAUL

APPLICANT: RATRN, MAITRA

TITLE OF INVENTION: OF RNA

TITLE OF INVENTION: OF RNA

NUMBER OF SEQUENCES: 22

CORRESPENDENCE ADDRESS:

ADDRESSEE: Knobbe, Martens, Olson and Bear

STREET: 620 Newport Center Drive

CITY: Newport Beach
             APPLICANT: TORRENCE, PAUL
APPLICANT: ROBERT, SILVERMAN
APPLICANT: RATAN, MITRA
APPLICANT: RATAN, MITRA
APPLICANT: RATAN, MITRA
TITLE OF INVENTION: METHOD OF CLEAVING SPECIFIC SEQUENCES
TITLE OF INVENTION: OF RNA
NUMBER OF SEQUENCES: 22
CORRESPONDENCE ADDRESS:
ADDRESSEE: Knobbe, Martens, Olson and Bear
STREET: 620 Newport Center Drive
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Length 22;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        1.5%; Score 17; DB 1; Length 22; 100.0%; Pred. Patent No. 56.4617
GENERAL INFORMATION:
GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: Modified Oligonucleotides that Detect and Modulate
TITLE OF INVENTION: Modified Oligonucleotides that Detect and Modulate
TITLE OF INVENTION: Gene Expression
NUMBER OF SEQUENCES:
ADDRESSEE: No 56.46177is
ADDRESSEE: No. 56.446177is
STREET: Data Liberty Place - 46th Floor
CITY: Philadelphia
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            5-fluoro-2'-deoxyuridine
substitution
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               5-fluoro-2'-deoxyuridine
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       5-fluoro-2'-deoxyuridine
substitution
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               5-fluoro-2'-deoxyuridine substitution
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       5-fluoro-2'-deoxyuridine
